```

Login System: Input/Output

```
Hello, user.
Input 1 to login(Note for login the users and corresponding passwords are user1: pass1 and user2:pass2)
Input 2 to sign up
: 1

Enter username: user1
Enter password: pass1
Welcome, user1!
Welcome to the Grade 8 Pisay GWA Calculator
Would you like to
1. Calculate your grade per subject
2. Calculate your GWA for the entire quarter
Or click any other number to exit
Please enter your response:
```

Signup System: Input/Output

```
Hello, user.
Input 1 to login(Note for login the users and corresponding passwords are user1: pass1 and user2:pass2)
Input 2 to sign up
: 2

Enter new username: CJ
Enter new password: Ilagan
```

Confirmation System with Error Handling System:

```
Enter new username: CJ
Enter new password: Ilagan
Confirm username: John
User not found, try again: CJ
Confirm password: paulo
Wrong password, try again: Ilagan
Welcome, CJ!
Welcome to the Grade 8 Pisay GWA Calculator
Would you like to
1. Calculate your grade per subject
2. Calculate your GWA for the entire quarter
Or click any other number to exit
Please enter your response:
```

GWA calculator Options:

```

Your score can not be greater than the max score
Please input your score for the FA: 50
Please type your maximum score for the FA: 50
Do you still have any fas to input(please input 1 or 2), 1 for yes 2 for no: 1
Please input your score for the FA
Score: 24
Please type your maximum score for the FA
Max Score: 25
Do you still have any fas to input(please input 1 or 2), 1 for yes 2 for no: 2
Please input your score for the AA
Score: 34
Please type your maximum score for the AA
Max Score: 40
Do you still have any aas to input(please input 1 or 2), 1 for yes 2 for no: 2
Please input your score for the LT
Score: 50
Please type your maximum score for the LT
Max Score: 56
Do you still have any lts to input(please input 1 or 2), 1 for yes 2 for no: 1
Please input your score for the LT
Score: 42
Please type your maximum score for the LT
Max Score: 41
Your score can not be greater than the max score
Please input your score for the LT: 42
```

Option Category 1 Input/Output with Error Handling Part 2(1st grading)

```
Please input your score for the LT: 42
Please type your maximum score for the LT: 42
Do you still have any lts to input(please input 1 or 2), 1 for yes 2 for no: 2
Please input your score for the perio: 50
Please input the max score for the perio: 50
Please input 1 for first grading and please input 2 for the other gradings: 1
Raw grade: 95.51
Your grade for Math 3 is 1.25
Would you like to try for another subject or quit the program(please enter 1 or 2): |
```

Option Category 1 input/output(2nd-4th grading)

```
Please input the subject with its corresponding number: 1
Please input your score for the FA
Score: 50
Please type your maximum score for the FA
Max Score: 50
Do you still have any fas to input(please input 1 or 2), 1 for yes 2 for no: 2
Please input your score for the AA
Score: 50
Please type your maximum score for the AA
Max Score: 50
Do you still have any aas to input(please input 1 or 2), 1 for yes 2 for no: 2
Please input your score for the LT
Score: 50
Please type your maximum score for the LT
Max Score: 50
Do you still have any lts to input(please input 1 or 2), 1 for yes 2 for no: 2
Please input your score for the perio: 50
Please input the max score for the perio: 50
Please input 1 for first grading and please input 2 for the other gradings: 2
Please input your raw grade(0-100) in Math 3: 96.45
Raw grade: 98.82
Your grade for Math 3 is 1.00
Would you like to try for another subject or quit the program(please enter 1 or 2): |
```

Option 1: exiting the program code(This pops up for every category),

```
response=int(input("Would you like to try for another subject or quit the program(please enter 1 or 2): "))
while response!=1 and response!=2:
    response=int(input("Please enter 1 or 2: "))
```

Option input/output, exiting the program(option 2)

```
Would you like to try for another subject or quit the program(please enter 1 or 2): 2
Thank you for using our program
The program is closing, Press anything to exit
```
